**Precast Manufacturer:** J.P. Carrara & Sons

## Overview:

This project was a complete bridge replacement located on Alexandria Ave. (CR77) in the town of Ticonderoga over the Lake George Outlet. The existing bridge was a single span concrete arch with an asphalt wearing surface. The total span length is approximately 49.5 feet and was built in 1929. The new structure that was constructed was a single-span 70' long x 36' wide and is comprised of 4 NEXT beams.
