**Dept. of Public Works Superintendent:** James Dougan

**Project Manager:** Andrew Stanley

**Construction Dates:** Aug. 2023 - July 2024

**Featured Crossing:** Sanford Lake (Hudson River)

**Designed by:** Foit-Albert Associates

**Contractor:** ING Civil

**Funding Source:** FHWA

**Project Cost:** Foit Albert - \$593,955.00

ING Civil - \$3,074,202.97

Project Grand Total- **\$3,668,157.97**

**Bridge Span:** 125 ft

**Precast Manufacturer:** L.C. Whitford

### **Overview:**

This project was a complete bridge replacement located on Tahawus rd. (CR25) in the town of Newcomb approximately 6.5 miles from the intersection with the Blue Ridge rd. (CR84). The existing 160' long x 19'-3" wide temporary Mabey truss bridge was constructed in 2020 and placed over the existing 100' long x 25' wide steel girder bridge on concrete abutments & pier built in 1941. The new structure that was constructed was a single-span 125' long x 27'-4" wide and is comprised of 4 NEBT beams. This project was awarded the 2024 APWA Capital Branch project of the year in the structures category for projects less than 5 Million.
