US ROUTE 9 SAFETY STUDY

COMMUNITY SURVEY NOW OPEN

You live here. We want to
know what you think.

We invite members of the community to share their experiences and insights by completing a short survey about travel conditions along US Route 9 in the Hamlet of Lewis. Your feedback on driving, walking, and biking is essential in helping us identify current challenges and opportunities for improvement. By participating, you'll play an important role in shaping future transportation planning and safety enhancements in our community. Please take a few minutes to complete the survey and help us create a safer, more accessible US Route 9 for everyone.

The Town of Lewis, along with Essex County and the New York State Department of Transportation (NYSDOT), is working on a safety study along US Route 9 within the Hamlet of Lewis. The Town's Comprehensive Plan outlines a vision to transform US Route 9 into a vibrant "Main Street" with improved sight distances, traffic calming measures, sidewalks, crosswalks, public parking, and landscaping. This study will help identify specific improvements to bring this vision to life.

By evaluating existing conditions, identifying challenges, and exploring opportunities for improvements, the study will provide a roadmap for future projects that support economic strength, public health, and community connectivity. This partnership reflects a shared commitment to creating a safer, more welcoming, and more resilient transportation system for the Town of Lewis.

All comments, questions, and concerns can be sent to US9SafetyStudy@mjteam.com.
